

# Habitat frame

- Frame to be external with ISO1161 container corners in Aluminium
  - Is to be insulated with 100mm insulation, 150mm for the floor to allow for additional services/frame to be routed in the floor that would allow for 'losses' in the insulation envelope.
  - The aluminium frame is to be bonded to the insulation with sika 522
- 
- 15ft unit? Like the small feet wheels:

- 20ft unit:
